FAMILY-OWNED, NATIONALLY KNOWN

Join a true family company and learn from individuals who are ambitious and passionate about construction management. Our internship program gives you an inside look at how we commit ourselves to our clients success and meet their project goals. Learn how to quickly solve construction challenges and deliver safe, quality, and cost effective projects. Along the way, you'll foster relationships with our clients, trade contractors, architects, and engineers that will set you on the path to becoming a well-rounded construction professional.

INTERNSHIP POSITIONS AVAILABLE

ESTIMATING ENGINEERS will work directly with the Estimating Department and assist in the development of project-specific estimates by performing thorough review of such documents as geotechnical reports, phase I and II reports, schematics, design development and construction drawings, and specifications. This position is intended as a training ground for individuals who want to gain the depth of knowledge and experience required to thrive in the construction industry.

ASSISTANT PROJECT MANAGERS will work directly with Senior Project Managers and practice administrative procedures for maintaining records on active projects. This position provides students with experience in managing commercial construction projects and knowledge of all project documents, including specifications, plans, submittals, subcontracts, shop drawings, and the schedule.

"I am very excited to come back after graduation and start a career here." - Former Intern

ASSISTANT SUPERINTENDENTS will work directly in the field and assist in coordinating all trade contractors and field activities on active construction projects. Assistant Superintendents will also help enforce safety procedures and review a range of project documents, including contracts, specifications, and blueprints.

"I thought this was a great learning experience! I got to see first hand the construction of a commercial building." - Former Intern
